PUBLIC FUN! XD. The biggest problem is with Ubisofts marketing team. This is a fantastic idea and I enjoyed messing around in the area but after 3 attempts where I couldn't find anyone to play with I grew bored.. First off there's no Uplay. Thank you lord. Now, this is a great little gem. There's a really interesting multiplayer shooter here, with great graphics and sound and a nifty idea. If more people gave this game a fair shot so its playerbase could grow this one would be a real keeper.. This is kind of like Agario.io meets Tron - I loved it! The Devs are active and to say how new the game is, it's really polished! If you want a casual game with a ton of replayability then this is one you should check out for sure.. This is a lovely simple game. I like the graphics, controls, everything! I played mostly after release when the player base was more active and probably should have played more then. Not really worth buying now due to the lack of players :(but the game is so good I just can't give it a thumbs down! I think the game would do well if it went f2p and sold skins, could attract more players.. Very fun, just buy it! The trailers basically show what you get but the gameplay is really fun.
